

# Technical English Glossary

**Student:** Joaquín Antonino

**Teacher:** Agustina Aizpitarte

**Course:** Technical English I

**Year:** 2025

## **1. Introduction**

This document presents a technical English glossary created as part of the course requirements. The project includes key computing terms used in class, each with its English term, Spanish translation, and English definition. The glossary also features pronunciation through the Web Speech API.

## **2. Technologies Used**

- HTML – Structure of the website.
- CSS – Visual design and dark theme.
- JavaScript – Search functionality, filters, and logic.
- Web Speech API – English word pronunciation.
- Vercel – Hosting platform for deployment.
